**Make Your Own Movie Machine: Build a Paper Zoetrope and Learn to Make Animation Cells** Rob Ives

Discover the magic of animation with this complete guide to creating a paper zoetrope. A forerunner to the modern movie, the zoetrope offers the illusion of motion from a series of individual pictures. Suitable for ages 13 and up, the book contains simple, well-illustrated instructions for assembling a viewer as well as a guide to designing custom animation strips using photographs and drawings.

Five pre-made animation strips — a walking dog, an exercising man, a rocking fox, and other images — help you get started. The book explains a variety of animation techniques for creating your own features, including stop motion animation, classical animation, and poseable paper characters. The approaches are as simple as pen-and-paper cartoons and as sophisticated as video clips taken with a digital camera — and using your imagination is the best method of all.
