Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21) George Klir, Doug Elias

One criterion for classifying books is whether they are written for a single purpose or for multiple purposes. This book belongs to the category of multipurpose books, but one of its roles is predominant-it is primarily a textbook. As such, it can be used for a variety of courses at the first-year graduate or upper-division undergraduate level. A common characteristic of these courses is that they cover fundamental systems concepts, major categories of systems problems, and some selected methods for dealing with these problems at a rather general level. A unique feature of the book is that the concepts, problems, and methods are introduced in the context of an architectural formulation of an expert system referred to as the general systems problem solver or aSPS-whose aim is to provide users of all kinds with computer-based systems knowledge and methodology. The aSPS architecture, which is developed throughout the book, facilitates a framework that is conducive to a coherent, comprehensive, and pragmatic coverage of systems fundamentals-concepts, problems, and methods. A course that covers systems fundamentals is now offered not only in systems science, information science, or systems engineering programs, but in many programs in other disciplines as well. Although the level of coverage for systems science or engineering students is surely different from that used for students in other disciplines, this book is designed to serve both of these needs.

From reader reviews:

Jason Urso:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a stroll, shopping, or went to often the Mall. How about open or maybe read a book allowed Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21)? Maybe it is for being best activity for you. You already know beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have some other opinion?

Shelly Gomes:

The e-book untitled Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21) is the publication that recommended to you to read. You can see the quality of the publication content that will be shown to you. The language that writer use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, therefore the information that they share to you personally is absolutely accurate. You also might get the e-book of Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21) from the publisher to make you a lot more enjoy free time.

James Brown:

The guide with title Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21) has a lot of information that you can discover it. You can get a lot of profit after read this book. This kind of book exist new know-how the information that exist in this e-book represented the condition of the world today. That is important to yo7u to be aware of how the improvement of the world. This book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Samuel Puckett:

E-book is one of source of information. We can add our know-how from it. Not only for students but native or citizen want book to know the revise information of year to year. As we know those books have many advantages. Beside most of us add our knowledge, could also bring us to around the world. From the book Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21) we can have more advantage. Don't someone to be creative people? To be creative person must want to read a book. Just choose the best book that ideal with your aim. Don't be doubt to change your life by this book Architecture of Systems Problem Solving (IFSR International Series on Systems Science and Engineering, Vol. 21). You can more attractive than now.
