An Analysis of the Integrated Mechanical Diagnostics Health and Usage Management System on Rotor Track and Balance Mark S. Revor

This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A896424. The abstract provided by the Pentagon follows: This thesis is concerned with the operational benefit of the Integrated Mechanical Diagnostics Health and Usage Management Systems (IMD HUMS) rotor track and balance (RTB) functionality. The questions addressed are whether there is a savings in flight hours expended on functional check flights (FCF's) when compared to present practices, if there will there be a reduction in directed maintenance man-hours (DMMH) spent on maintenance related to the rotor system, and the impact on Operational Availability. Experiments were conducted using a discrete event simulation model of squadron flight operations and organizational level maintenance. The simulation is generic and can be used in the analysis of other helicopters. Input parameters governing the distributions of maintenance action inter-arrival times were estimated from Naval Aviation Logistics Data Analysis (NALDA) databases and squadron experiences on such systems. The analysis suggests that flight hours spent in FCF are dependent upon vibration growth rate, an unknown quantity, and the maintenance policy for rotor smoothing. Directed maintenance man-hours decrease with increasing numbers of IMD HUMS configured aircraft and further gains are achieved with a maintenance policy suited to a continuous monitoring system.

From reader reviews:

Tyrone Smith:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a walk, shopping, or went to the Mall. How about open or even read a book allowed An Analysis of the Integrated Mechanical Diagnostics Health and Usage Management System on Rotor Track and Balance? Maybe it is to get best activity for you. You know beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have other opinion?

Amado Spieker:

Book is actually written, printed, or highlighted for everything. You can know everything you want by a publication. Book has a different type. We all know that that book is important factor to bring us around the world. Next to that you can your reading ability was fluently. A reserve An Analysis of the Integrated Mechanical Diagnostics Health and Usage Management System on Rotor Track and Balance will make you to possibly be smarter. You can feel much more confidence if you can know about every thing. But some of you think that open or reading some sort of book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you seeking best book or ideal book with you?

Mildred Kelly:

In this 21st one hundred year, people become competitive in each way. By being competitive now, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that often many people have underestimated this for a while is reading. Yep, by reading a guide your ability to survive enhance then having chance to stay than other is high. For yourself who want to start reading any book, we give you that An Analysis of the Integrated Mechanical Diagnostics Health and Usage Management System on Rotor Track and Balance book as basic and daily reading guide. Why, because this book is usually more than just a book.

Diane McCarthy:

Publication is one of source of expertise. We can add our understanding from it. Not only for students but also native or citizen require book to know the upgrade information of year to help year. As we know those guides have many advantages. Beside all of us add our knowledge, also can bring us to around the world. Through the book An Analysis of the Integrated Mechanical Diagnostics Health and Usage Management System on Rotor Track and Balance we can take more advantage. Don't someone to be creative people? Being creative person must love to read a book. Only choose the best book that appropriate with your aim. Don't be doubt to change your life by this book An Analysis of the Integrated Mechanical Diagnostics Health and Usage Management System on Rotor Track and Balance. You can more desirable than now.
