Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants Sabine Latteman

Seawater desalination is a coastal-based industry. The growing number of desalination plants worldwide and the increasing size of single facilities emphasises the need for greener desalination technologies and more sustainable desalination projects. Two complementing approaches are the development and implementation of best available technology (BAT) standards and best practice guidelines for environmental impact assessment (EIA) studies. While BAT is a technology-based approach, which favours state of the art technologies that reduce resource consumption and waste emissions, EIA aims at minimizing impacts at a site- and project-specific level through environmental monitoring, evaluation of impacts, and mitigation where necessary. This book contains a comprehensive evaluation and synthesis of the potential environmental impacts of desalination plants, with emphasis on the marine environment and aspects of energy use, followed by the development of strategies for impact mitigating. A concept for BAT for seawater desalination technologies is proposed, in combination with a methodological approach for the EIA of desalination projects. The scope of the EIA studies are outlined, including environmental monitoring, toxicity and hydrodynamic modelling studies, and the usefulness of multi-criteria analysis as a decision support tool for EIAs is explored and used to compare different intake and pretreatment options for seawater reverse osmosis plants.

From reader reviews:

Melanie Fox:

A lot of people always spent their own free time to vacation or even go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you want to try to find a new activity that is look different you can read any book. It is really fun to suit your needs. If you enjoy the book that you just read you can spent all day long to reading a publication. The book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants it is rather good to read. There are a lot of people who recommended this book. They were enjoying reading this book. When you did not have enough space bringing this book you can buy the particular e-book. You can m0ore simply to read this book from a smart phone. The price is not to fund but this book provides high quality.

Thomas Burke:

You may spend your free time to study this book this e-book. This Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants is simple to create you can read it in the area, in the beach, train along with soon. If you did not include much space to bring often the printed book, you can buy the actual e-book. It is make you much easier to read it. You can save typically the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Thomas Smith:

Beside this kind of Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants in your phone, it may give you a way to get more close to the new knowledge or information. The information and the knowledge you can got here is fresh from your oven so don't be worry if you feel like an previous people live in narrow community. It is good thing to have Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants because this book offers to your account readable information. Do you often have book but you rarely get what it's facts concerning. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss this? Find this book in addition to read it from today!

Aurora Ammon:

That book can make you to feel relax. That book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants was colorful and of course has pictures on there. As we know that book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants has many kinds or genre. Start from kids until teenagers. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and unwind. Try to choose the best

book to suit your needs and try to like reading that will.
