New Developments in the Therapy of Allergic Disorders and Asthma: Workshop, Monte Carlo, November 1992 (International Academy for Biomedical and Drug Research, Vol. 6)

Recent evidence showing an increase in the incidence of asthma and allergic disorders over the past decade has stimulated research into new drug therapies for these conditions. This volume focuses on basic and clinical aspects of allergic disorders and asthma. The contributors discuss the role of molecular pharmacology, pharmacology and immunology in this area. Current therapeutic strategies are also assessed and future research directions are considered. Highlighting some of the recent problems with anti-allergic compounds and discussing current issues, this book should interest pharmacologists, clinicians and regulatory authorities, as well as medical and marketing representatives in the pharmaceutical industry.
