Visualizing Time: Designing Graphical Representations for Statistical Data (Springer Series in Chemical Physics) Graham Wills

Art, or Science? Which of these is the right way to think of the field of visualization? This is not an easy question to answer, even for those who have many years experience in making graphical depictions of data with a view to help people understand it and take action. In this book, Graham Wills bridges the gap between the art and the science of visually representing data. He does not simply give rules and advice, but bases these on general principles and provide a clear path between them

This book is concerned with the graphical representation of time data and is written to cover a range of different users. A visualization expert designing tools for displaying time will find it valuable, but so also should a financier assembling a report in a spreadsheet, or a medical researcher trying to display gene sequences using a commercial statistical package.

From reader reviews:

Vera Velez:

In this 21st millennium, people become competitive in every way. By being competitive right now, people have to do something to make all of them survive, being in the middle of the crowded place and notice by surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yes, by reading a reserve your ability to survive boost then having chance to stay than other is high. For yourself who want to start reading any book, we give you that Visualizing Time: Designing Graphical Representations for Statistical Data (Springer Series in Chemical Physics) book as nice and daily reading book. Why, because this book is more than just a book.

Esther Tackett:

The reason? Because this Visualizing Time: Designing Graphical Representations for Statistical Data (Springer Series in Chemical Physics) is an unordinary book that the inside of the book waiting for you to snap this but latter it will surprise you with the secret that inside. Reading this book beside it was fantastic author who else write the book in such remarkable way makes the content inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of benefits than the other book have got such as help improving your expertise and your critical thinking way. So , still want to hold up having that book? If I were being you I will go to the reserve store hurriedly.

Jesus Gates:

Many people spending their time period by playing outside using friends, fun activity having family or just watching TV all day long. You can have new activity to pay your whole day by examining a book. Ugh, ya think reading a book will surely hard because you have to take the book everywhere? It alright you can have the e-book, having everywhere you want in your Mobile phone. Like Visualizing Time: Designing Graphical Representations for Statistical Data (Springer Series in Chemical Physics) which is having the e-book version. So , try out this book? Let's see.

Cleora Yarbro:

As we know that book is important thing to add our know-how for everything. By a reserve we can know everything you want. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This publication Visualizing Time: Designing Graphical Representations for Statistical Data (Springer Series in Chemical Physics) was filled about science. Spend your free time to add your knowledge about your science competence. Some people has several feel when they reading any book. If you know how big advantage of a book, you can really feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you simply wanted.
