Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter Frank Blum

The present book is based on the author's diploma thesis written at the Institute of Media and Phototechnology University of Applied Sciences Cologne and describes the recent development of digital interactive art and the usage of the graphical programming environment Max/MSP/Jitter. In the beginning, a brief overview of the present scientific discourse on the key issues interactivity and interface design are given. Furthermore, it portrays exceptional examples of digital art within the past five years, focusing on the main themes of digital installations and software art. This is followed by a description of Max's main features and programming methods, its extensibility with control devices and micro controllers, as well as differences to important alternative graphical programming environments such as Pure data and vvvv. The second part documents the whole process of creating an interactive installation using Max/MSP and its graphics extension Jitter. This includes a description of the creative concept, the different parts of the soft- and hardware as well as some of their important key techniques. Finally, a summary of user feedback and a personal reflection on the project is given. The book is dedicated to both technicians and artists seeking an introduction to the present digital interactive art and practical information about the new emerging graphical programming techniques like Max or Pure Data for creating meaningful interactive systems.

From reader reviews:

Connie Cornish:

The book Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter? A number of you have a different opinion about e-book. But one aim this book can give many info for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or information that you take for that, it is possible to give for each other; you can share all of these. Book Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter has simple shape but the truth is know: it has great and large function for you. You can seem the enormous world by available and read a reserve. So it is very wonderful.

Jennifer Fields:

This Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is definitely information inside this guide incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. This specific Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter without we recognize teach the one who looking at it become critical in contemplating and analyzing. Don't always be worry Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter can bring if you are and not make your handbag space or bookshelves' come to be full because you can have it in your lovely laptop even cell phone. This Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter having excellent arrangement in word as well as layout, so you will not experience uninterested in reading.

Kent Ibarra:

Do you one among people who can't read satisfying if the sentence chained in the straightway, hold on guys this particular aren't like that. This Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter book is readable through you who hate the straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to supply to you. The writer connected with Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter content conveys the idea easily to understand by many people. The printed and e-book are not different in the written content but it just different available as it. So , do you nonetheless thinking Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter is not loveable to be your top list reading book?

Ralph Wood:

Playing with family in a park, coming to see the ocean world or hanging out with buddies is thing that usually you have done when you have spare time, after that why you don't try matter that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Digital Interactive Installations: Programming interactive installations using the software package Max/MSP/Jitter, you may enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't understand it, oh come on its known as reading friends.
