Alfred Tarski: Early Work in Poland-Geometry and Teaching

Alfred Tarski: Early Work in Poland-Geometry and Teaching

Alfred Tarski (1901–1983) was a renowned Polish/American mathematician, a giant of the twentieth century, who helped establish the foundations of geometry, set theory, model theory, algebraic logic and universal algebra. Throughout his career, he taught mathematics and logic at universities and sometimes in secondary schools. Many of his writings before 1939 were in Polish and remained inaccessible to most mathematicians and historians until now.

This self-contained book focuses on Tarski's early contributions to geometry and mathematics education, including the famous Banach–Tarski paradoxical decomposition of a sphere as well as high-school mathematical topics and pedagogy. These themes are significant since Tarski's later research on geometry and its foundations stemmed in part from his early employment as a high-school mathematics teacher and teacher-trainer. The book contains careful translations and much newly uncovered social background of these works written during Tarski's years in Poland.

Alfred Tarski: Early Work in Poland serves the mathematical, educational, philosophical and historical communities by publishing Tarski's early writings in a broadly accessible form, providing background from archival work in Poland and updating Tarski's bibliography.

From reader reviews:

Mary Moore:

The book Alfred Tarski: Early Work in Poland-Geometry and Teaching make one feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can to be your best friend when you getting tension or having big problem with the subject. If you can make studying a book Alfred Tarski: Early Work in Poland-Geometry and Teaching for being your habit, you can get far more advantages, like add your own capable, increase your knowledge about several or all subjects. You can know everything if you like start and read a reserve Alfred Tarski: Early Work in Poland-Geometry and Teaching. Kinds of book are a lot of. It means that, science guide or encyclopedia or others. So , how do you think about this reserve?

Harry Oliver:

Reading a e-book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new details. When you read a publication you will get new information due to the fact book is one of several ways to share the information or their idea. Second, studying a book will make anyone more imaginative. When you reading a book especially fictional works book the author will bring one to imagine the story how the characters do it anything. Third, it is possible to share your knowledge to other people. When you read this Alfred Tarski: Early Work in Poland-Geometry and Teaching, you may tells your family, friends and soon about yours publication. Your knowledge can inspire the mediocre, make them reading a e-book.

Albert Chesson:

You could spend your free time to read this book this reserve. This Alfred Tarski: Early Work in Poland-Geometry and Teaching is simple to develop you can read it in the playground, in the beach, train as well as soon. If you did not have much space to bring the actual printed book, you can buy the actual e-book. It is make you much easier to read it. You can save the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Bernice Martinez:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book was rare? Why so many problem for the book? But any people feel that they enjoy for reading. Some people likes reading, not only science book but additionally novel and Alfred Tarski: Early Work in Poland-Geometry and Teaching as well as others sources were given know-how for you. After you know how the great a book, you feel desire to read more and more. Science reserve was created for teacher or maybe students especially. Those books are helping them to add their knowledge. In additional case, beside science reserve, any other book likes Alfred Tarski: Early Work in Poland-Geometry and Teaching to make your spare time considerably more colorful. Many types of book like this.
