The ritual murder accusation is one of a series of myths that fall under the label blood libel, and describes the medieval legend that Jews require Christian blood for obscure religious purposes and are capable of committing murder to obtain it. This malicious myth continues to have an explosive afterlife in the public sphere, where Sarah Palin's 2011 gaffe is only the latest reminder of its power to excite controversy. *Blood Libel* is the first book-length study to analyze the recent historiography of the ritual murder accusation and to consider these debates in the context of intellectual and cultural history as well as methodology. Hannah R. Johnson articulates how ethics shapes methodological decisions in the study of the accusation and how questions about methodology, in turn, pose ethical problems of interpretation and understanding. Examining recent debates over the scholarship of historians such as Gavin Langmuir, Israel Yuval, and Ariel Toaff, Johnson argues that these discussions highlight an ongoing paradigm shift that seeks to reimagine questions of responsibility by deliberately refraining from a discourse of moral judgment and blame in favor of an emphasis on historical contingencies and hostile intergroup dynamics.
