English has an insatiable appetite for new words, new meanings or interpretations. Most new words - or neologisms (from Greek neo+logos, or new word) – are self-explanatory, but some new words and new meanings arise from the parallel universe of punsters.

Noellogisms exposes the wordplay within this parallel universe, with over a thousand puns, homophones and other examples of verbal vandalism. The title deliberately misspells neologisms because, while shaping this book, punster Noel Mitaxa could not resist adding his own personal twist.

If any entries are hard to grasp, reading them aloud may help. You are freely aloud to do this, though maybe not while commuting. Some commuters may react with withering glares or just ignore you, but you may equally discover an enlarged groan-zone as other word-nerds or phonetic fanatics happily remove their impersonal commuter masks.
